

Managed Blackberry Enterprise Services

Blackberry Enterprise Server Hosting

Our automated backup, replication and recovery offering also includes Blackberry Enterprise Server Replication and Hosting services via secure, reliable, efficient internet connection. You get a data protection solution that lets you safeguard your BES environment without additional capital or IT expenses. We automatically replicate your Blackberry Enterprise Server and our infrastructure can server as either your primary BES or your secondary BES. Our Hosted BES service provides the full suite of advanced security features and policies that come with the BlackBerry Enterprise Server suite, including AES or Triple DES encryption.
